

Nikos Mavrapidis.

SOFTWARE ENGINEER · SYSTEMS & APPLIED AI

Software engineer with nearly three years across embedded networking, industrial software, and satellite Earth Observation; part-time co-founder of an AI recruitment startup (2025–2026). Focused on reliable systems, retrieval, and applied AI.

EXPERIENCE

- Jul 2026—Present **Software Engineer · Space & Earth Observation** · SoftCom International · European space project
- Working on an Earth Observation project focused on satellite-data discovery, STAC catalogues, and retrieval/vector-search architectures for distributed geospatial datasets.
- Nov 2025—Jul 2026 **Software Engineer · Industrial Printing (Test Automation)** · SoftCom International
- Robot Framework UI and REST automation across four modules; Jenkins and Gradle/Maven builds.
- Oct 2025—Sep 2026 **Co-founder** · Lope · AI recruitment startup · part-time, alongside SoftCom
- Built the retrieval stack: hybrid search on Milvus, rank fusion, and RAG with verified citations.
 - Owned the production architecture: Next.js, TypeScript, PostgreSQL with row-level security, and CI.
 - In production with recruiting agencies; 98.7% enrichment success across ~3,000 profiles.
- Jun 2025—Dec 2025 **Software Engineer · Industrial Printing (Java)** · SoftCom International
- Delivered a backend and front-end module extension and modernised legacy modules.
 - Led a critical memory-leak investigation from profiling to fix and regression tests.
- Dec 2023—Jun 2025 **Software Engineer · Embedded Linux & Networking** · SoftCom International · telecom client
- Built carrier-grade embedded Linux networking software in C/C++ on an IP/MPLS routing platform.
 - Delivered Hitless Software Upgrades, cutting upgrade downtime from hundreds of milliseconds to zero.
 - Integrated a third-party routing stack; validated control and data planes with Wireshark and Spirent.
- Nov 2022—Aug 2023 **Military service** · Hellenic Armed Forces

SELECTED PROJECTS

Camelia Wellness · Client platform · Full-stack · 2025

Bilingual service and booking platform with SEO and versioned GCP/Cloudflare releases with rollback.

Worthify · Team project · 1st Greek AI Hackathon · Nov 2023—May 2024

Team prototype: used-car valuation on 100,000+ listings; team-reported R^2 0.97, ~6% median error.

Ubiquitous Computing Exhibit · BSc thesis · NKUA · published Oct 2023 · exhibit 2026

Interactive museum exhibit that explains ubiquitous computing through a scrolling story, short quizzes, and camera experiments.

SKILLS

AI & retrieval

Hybrid search & rank fusion, Vector databases (Milvus), RAG & LLM integration, Reranking, STAC / EO metadata

Testing

Robot Framework & Selenium, REST & UI automation, Playwright, VisualVM profiling

Systems

C/C++ · embedded Linux (Yocto), IP/MPLS, TCP/IP, Java, Python, Bash, SQL, TypeScript, Next.js, React

Delivery

Jenkins / GitLab CI, Gradle, Maven, Artifactory, Docker, PostgreSQL, AWS & GCP

EDUCATION

2017—2022

BSc in Informatics and Telecommunications · National and Kapodistrian University of Athens
240 ECTS · Grade 7.67 / 10 · [BSc thesis \(published Oct 2023\)](#)

CERTIFICATIONS & TRAINING

AWS Certified AI Practitioner · AWS · 2026
Decoding DevOps (60+ hours) · Udemy · 2026
Cybersecurity Fundamentals · Cyber Defense Architecture · IBM · 2026
Introduction to Cybersecurity · Networking Basics · Networking Devices · Cisco · 2025
Networking Basics and Security · IBM · 2025
MPLS L3VPN · Employer-funded · 2024
[Software Engineering Basics for Everyone](#) · IBM · edX · 2023
[High-Dimensional Data Analysis](#) · HarvardX · edX · 2023

COMPETITIONS

1st Greek AI Hackathon · ACEin · AUEB · 2024
MobileHCI student volunteer · ACM SIGCHI · 2023
Google Hash Code · Athens hub, NTUA · 2022
